The Ultimate Digital Pathology Flow

Quantitative results in support of conclusive diagnosis

Welcome to your optimized workflow:

1
View & Mark
your reference slide

or

2
Match
region of interest
with IHC panel

Flexible panel display of
multiple slides with **unique**
annotations and statistics

View&Mark >>> Match >>> Analyze >>> Report >>> Complete!

3

Analyze

for quantitative results

4

Report

scores and snapshots

Benefits to Your Diagnostics:

- ✓ **Exceptional image quality** up to 80X digital zoom
- ✓ **Intuitive navigation** and improved workflow
- ✓ **Advanced visualization tools** for in-depth examination
- ✓ Accurate, computer-aided analysis on **Whole Slide Images**
- ✓ And so much **more**

Onscreen Digital Zoom to High Magnification

Flexible Display Layouts per Clinical Test

Full breast panel on a single screen, free selection

Specialized Algorithms:

Integrated tissue detection, tissue matching and cell classification algorithms that can account for what the human eye may not see.

Examine H&E side by side with PD-L1

Comprehensive Digital Pathology System

Digital

Labor efficient
Easy data access
Quantitative analysis

Standardized

Reduced human error
Diagnostic confidence
Results consistency

Connected

Easy communication
Faster turnaround times
Remote access

High Throughput Scanning. Capture slides in minutes!

“As an early adopter of the PD-L1 immunostain methodology, our group quickly recognized the inter and intra observer variability in scoring and interpretation of the stain, especially when there is non-uniform staining among tumor regions. We have been very pleased with the added confidence that HiPath Pro provides us in improving accuracy and precision of interpretation.”

Dr. Lija Joseph, Lowell General Hospital

IHC & CISH Quantitative Scoring

All nuclear and membrane staining

Wide range of tissue samples (e.g. breast, lung, colon, bladder, brain)

Telepathology at Its Best!

GenASIs AnyWhere™ for Remote Access and TC / PC Model Support

Lab Connectivity Anytime, Anywhere
Review, analyze and sign off case information
from any location via a secured network

LabLife™ for Lab Management

Benchmarks

communicate to customers and management your turnaround times

Optimization

identify best practices to increase ROI per case and focus improvement efforts

Growth

justify investment in additional capital equipment for the lab

Annual analysis and review

compare performance year on year and make data driven decisions

ASI Company Overview

Applied Spectral Imaging (ASI) is a global leader in biomedical imaging with a comprehensive product portfolio and a global distribution footprint.

Founded in 1993, ASI markets, services and supports its products in nearly 50 countries. With a wide FDA clearance portfolio, you can rest assured that ASI applications have been rigorously tested for compliance and clinical use.

The Company's technology, powered by GenASIs, enables pathology, cytogenetics and research laboratories to provide advanced diagnostics to patients through superior digital diagnostic tools. ASI has a wide portfolio of dedicated solutions for brightfield, fluorescence and spectral imaging and analysis, including HiPath Pro, PathFusion, HiBand, HiFISH, CytoPower and Rainbow.

The Company has offices in the US and Asia and a global network of distribution partners.
